Protect your Lone Workers with a ZOLEO Device and Ok Alone

ZOLEO Satellite devices can now be linked directly to Ok Alone worker profiles. This means location updates, check-ins and any SOS requests will appear in the Ok Alone Dashboard

You can also set pre-defined messages to easily start a shift, check-in, send a high-risk check in and end a shift with your ZOLEO app and device.
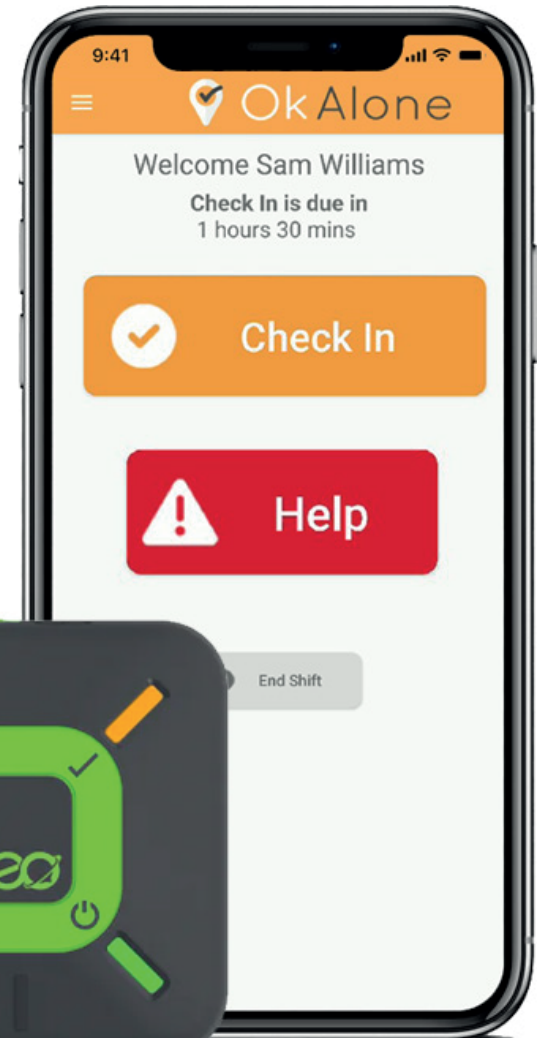

After every status update with Ok Alone you will get an SMS to your ZOLEO device confirming your current status and when the next check-in is due.

The Location Share+ Integration

All location data from ZOLEO can now be sent directly to the Ok Alone dashboard. Meaning you have a full record of worker shifts in one place and will always get an updated location for any emergencies.

Use the Ok Alone app and ZOLEO Device together

Our integration means that a worker can use our lone worker app for day-to-day monitoring and switch to the ZOLEO device any time they move into a remote area.

ZOLEO Features for lone workers:

- IP68 protection against dust and water
- One touch Check In button that also sends location data
- The data feed integration sends location data directly to Ok Alone
- SOS button to immediately send for help
- Use Ok Alone advanced monitoring features for any alerts
- Can connect to a smartphone app via Bluetooth

- Works internationally, using the Iridium satellite network
- Messages can be customized to work with Ok Alone
- Also send texts via cellular and Wi-Fi
- 8 days of battery life if left on 24 hours a day
- Dedicated SMS number and email address
